

## How to install artificial hedges on a brick wall ?

### 1.Measurement

Measure the wall size by a band tape and work out the exact quantity of the grid panels and artificial hedges needed.

### 2.Cutting the Grid Panels Into Appropriate Size

Cut the grid panels into suitable size according to wall size.

### 3.Attaching the Grid Panels to the Wall

Calculate the estimated punching position in advance and mark it on the wall. Use an electric drill to punch a hole at the marked position and fix the grid panels with expansion screws as above picture shows.

#### 4. Taking Out of the Products

Open the box with a knife carefully and pay attention to the texture and direction of our hedge panels.

#### 5. Connecting the Hedge Panels

Collect the hedge panels together to a suitable size by using snap-to-lock system. (Please notice the same direction)

#### 6. Rolled for Storage

The hedges can be rolled up for easier storage and handling.

## 7. Fastening the Artificial Hedge Panels

Using the plastic cable ties to fasten the hedge panels and cut the extra parts of cable ties with a scissor.

Thanks for choosing our products, please contact our team for friendly and personal advice on installing if you feel confused.
